AACR’s Sustained & Active Support of Cancer Prevention Research, Researchers

- Grant solicitations
- Representation on governance and various “action” committees and working groups (e.g., program, education, molecular epi, minorities in cancer research, etc.)
- Active solicitations for sessions/abstracts in annual meetings
- Dedicated meetings in the area
  - Frontiers in Cancer Prevention
  - Science of Cancer Health Disparities in Racial/Ethnic Minorities & Medically Underserved
- Periodic summits to survey members’ input into directions/actions of the organization
- Standing “Cancer Prevention Committee”
- Journals dedicated to cancer prevention
  - *Cancer Epidemiology, Biomarkers and Prevention*
  - *Cancer Prevention Research*
- Science Policy & Governmental Affairs Committee
  - Tobacco, Disparities, Health Policy, Regulatory Science & Policy
- *Cancer Today* for survivors, cancer patients, lay public
- Annual *Cancer Progress Report*
- AACR Foundation to gain philanthropic support
Meeting Goals & Objectives

1. Review the state of cancer prevention science and current challenges and opportunities
2. Identify top priorities and future research directions for screening, early detection and cancer intervention
3. Determine the best way to organize AACR’s support of the cancer prevention scientific community through communications, meetings, journals, education, and training
4. Discuss how AACR can best serve the public by advancing public policy, public education, and services in cancer prevention and early detection
5. Identify how best to collaborate with relevant sectors to advance cancer prevention on a national and international level
